DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to an optical sensor, classified in class 435, subclass 808.
- II. Claims 12-19, drawn to a rollerbar, classified in class 492, subclass 16.
- III. Claims 23-36, drawn to keyboard support structure, classified in class 361, subclass 680.
- IV. Claim 27-28, drawn to horizontal tracking, classified in class 382, subclass 103.
- V. Claims 29-44, drawn to a mouse, classified in class 345, subclass 163.
- VI. Claims 45-47, drawn to a connection device, classified in class 439, subclass 43.

The inventions are distinct, each from the other because of the following reasons:

Inventions V and I-IV, VI are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination has specific properties of a horizontal base, enclosure, rollerbar, function

keys, sensor and connection. The subcombination (group I) has separate utility such as an optical sensor for other devices. The subcombination (group II) has separate utility such as a rollerbar for other devices. The subcombination (group III) has separate utility such as a keyboard support structure. The subcombination (group IV) has separate utility such as a mouse with horizontal tracking and traversal control. The subcombination (group VI) has separate utility such as a connection configuration for a mouse to a computer.

Because these inventions are distinct for the reasons given above and the search required for Group V is not required for Group I-IV, VI restriction for examination purposes as indicated is proper.

A telephone call was made to Beverly E. Hjorth on September 10, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
